Business Mix, Diversity and Fee Based Margin

**Business Mix –
FY 2015 Operating Margin**

**Fee-Based Margin –
2015 and 2016E**

**Field G&P Diversity –
FY 2015 Natural Gas Inlet Volumes**

- ◆ At IPO in 2007, TRP operated a single G&P system (North Texas), with ~100% POP exposure
- ◆ Since then, TRP has developed into a fully diversified midstream services provider:
 - ◆ Significant margin contributions from both Downstream and G&P operations
 - ◆ Diversification across 10+ shale/resource plays
 - ◆ Diversification in downstream activities (fractionation, LPG exports, treating, storage, etc.)
- ◆ ~70% fee-based margin for 2015 and 2016E provides cash flow stability

Diversity and Scale Help Mitigate Commodity Price Changes

- ◆ Growth has been driven by investing in the business, not by changes in commodity prices
- ◆ TRP benefits from multiple factors that help mitigate commodity price volatility, including:
 - ◆ Scale
 - ◆ Business and geographic diversity
 - ◆ Increasing fee-based margin
 - ◆ Hedging
- ◆ Based on our estimate of current equity volumes, approximately 40% of natural gas, 40% of condensate and 20% of NGLs are hedged for 2016
- ◆ Based on our estimate of current equity volumes, approximately 20% of natural gas, 20% of condensate and 10% of NGLs are hedged for 2017
- ◆ Per press release on October 5th, commodity price only sensitivities to 2016 Adjusted EBITDA:
 - ◆ +/- \$0.05/gal NGLs = +/- \$20 million Adj. EBITDA
 - ◆ +/- \$0.25/MMBtu nat gas = +/- \$10 million Adj. EBITDA
 - ◆ +/- \$5.00/bbl crude oil = +/- \$5 million Adj. EBITDA

Note: Targa's composite NGL barrel comprises 37% ethane, 35% propane, 6% iso-butane, 12% normal butane, and 10% natural gasoline

Fee-Based Margin Provides Cash Flow Stability

Increasing Fee-Based Margin Provides Additional Stability to Our Business

(\$ in millions)

*TRP's growth in fee-based margin provides cash flow stability –
At least 70% of 2016E operating margin expected to be fee-based*

2016 Net Growth Capex

- ◆ Targa has four major projects underway, representing approximately \$275 million of 2016E growth capex (net)
 - ◆ Pre-funded equity portion of 2016E growth capex via a \$125 million Series A Preferred Unit Offering in October 2015
 - ◆ All four projects will provide cash flow in 2016
- ◆ Targa has identified up to an additional \$250 million of 2016E growth capex
 - ◆ Projects may be deferred depending on market conditions and activity levels
 - ◆ High return, strategic projects will be funded utilizing revolver liquidity, debt markets, joint ventures and other equity sources

Reconciliations

Non-GAAP Measures Reconciliation

This presentation includes the non-GAAP financial measure of Adjusted EBITDA. The presentation provides a reconciliation of this non-GAAP financial measures to its most directly comparable financial measure calculated and presented in accordance with generally accepted accounting principles in the United States of America ("GAAP"). Our non-GAAP financial measures should not be considered as alternatives to GAAP measures such as net income, operating income, net cash flows provided by operating activities or any other GAAP measure of liquidity or financial performance.

Non-GAAP Measures Reconciliation

Adjusted EBITDA - The Partnership defines Adjusted EBITDA as net income attributable to Targa Resources Partners LP before: interest; income taxes; depreciation and amortization; impairment of goodwill; gains or losses on debt repurchases, redemptions, amendments, exchanges and early debt extinguishments and asset disposals; risk management activities related to derivative instruments including the cash impact of hedges acquired in the APL merger; non-cash compensation on Partnership equity grants; transaction costs related to business acquisitions; earnings/losses from unconsolidated affiliates net of distributions, distributions from preferred interests and the non-controlling interest portion of depreciation and amortization expenses. Adjusted EBITDA is used as a supplemental financial measure by the Partnership and by external users of its financial statements such as investors, commercial banks and others. The economic substance behind management's use of Adjusted EBITDA is to measure the ability of its assets to generate cash sufficient to pay interest costs, support its indebtedness and make distributions to its investors.

Adjusted EBITDA is a non-GAAP financial measure. The GAAP measures most directly comparable to Adjusted EBITDA are net cash provided by operating activities and net income attributable to Targa Resources Partners LP. Adjusted EBITDA should not be considered as an alternative to GAAP net cash provided by operating activities or GAAP net income. Adjusted EBITDA has important limitations as an analytical tool. Investors should not consider Adjusted EBITDA in isolation or as a substitute for analysis of the Partnership's results as reported under GAAP. Because Adjusted EBITDA excludes some, but not all, items that affect net income and net cash provided by operating activities and is defined differently by different companies in the Partnership's industry, the Partnership's definition of Adjusted EBITDA may not be comparable to similarly titled measures of other companies, thereby diminishing its utility.

Management compensates for the limitations of Adjusted EBITDA as an analytical tool by reviewing the comparable GAAP measures, understanding the differences between the measures and incorporating these insights into its decision-making processes.
