Strong Growth in Fee-Based Margin Continues

Increasing Fee-Based Margin Provides Additional Stability to Our Business

- ◆ Capex projects with firm contracts provide clear visibility on increasing fee operating margin
- ◆ Additional fee-based projects in progress for 2015 and beyond:
 - ◆ CBF Train 5 expansion
 - ◆ Additional Badlands infrastructure and potential plant
 - ◆ Terminal / condensate splitter project or projects supported by long-term agreements with Noble
- ◆ Other major fee-based projects under development:
 - ◆ Additional fractionation
 - ◆ Ethane export
 - ◆ Additional condensate splitter / export projects

Diversity and Scale Mitigate Commodity Price Changes

- ◆ Growth has been driven by investing in the business, not by changes in commodity prices
- ◆ TRP benefits from multiple factors that help mitigate commodity price volatility, including:
 - ◆ Scale
 - ◆ Business and geographic diversity
 - ◆ Increasing fee-based margin
 - ◆ Hedging
- ◆ TRP's current hedges include:
 - ◆ Approximately 55% of natural gas equity volumes for 2015 and 25% for 2016
 - ◆ Approximately 45% of condensate equity volumes for 2015 and 30% for 2016
 - ◆ Approximately 12% of 2015 NGL volumes
- ◆ Given our hedge position and our large fee-based operating margin, we estimate the following sensitivities for Targa Standalone 2015 EBITDA:
 - ◆ A \$5 drop in crude price would decrease EBITDA by ~\$3 million
 - ◆ A \$0.05 drop in the weighted average NGLs price would decrease EBITDA by ~\$12 million
 - ◆ A \$0.25 drop in natural gas price would decrease EBITDA by ~\$5 million

Non-GAAP Measures Reconciliation

This presentation includes the non-GAAP financial measure of Adjusted EBITDA. The presentation provides a reconciliation of this non-GAAP financial measures to its most directly comparable financial measure calculated and presented in accordance with generally accepted accounting principles in the United States of America ("GAAP"). Our non-GAAP financial measures should not be considered as alternatives to GAAP measures such as net income, operating income, net cash flows provided by operating activities or any other GAAP measure of liquidity or financial performance.

Non-GAAP Measures Reconciliation

Adjusted EBITDA – The Partnership and Targa define Adjusted EBITDA as net income attributable to Targa Resources Partners LP before: interest; income taxes; depreciation and amortization; gains or losses on debt repurchases and redemptions; early debt extinguishment and asset disposals; non-cash risk management activities related to derivative instruments; changes in the fair value of the Badlands acquisition contingent consideration and the non-controlling interest portion of depreciation and amortization expenses. Adjusted EBITDA is used as a supplemental financial measure by our management and by external users of our financial statements such as investors, commercial banks and others. The economic substance behind management's use of Adjusted EBITDA is to measure the ability of our assets to generate cash sufficient to pay interest costs, support our indebtedness and make distributions to our investors.

Adjusted EBITDA is a non-GAAP financial measure. The GAAP measures most directly comparable to Adjusted EBITDA are net cash provided by operating activities and net income (loss) attributable to Targa Resources Partners LP. Adjusted EBITDA should not be considered as an alternative to GAAP net cash provided by operating activities or GAAP net income. Adjusted EBITDA has important limitations as an analytical tool. Investors should not consider Adjusted EBITDA in isolation or as a substitute for analysis of our results as reported under GAAP. Because Adjusted EBITDA excludes some, but not all, items that affect net income and net cash provided by operating activities and is defined differently by different companies in our industry, our definition of Adjusted EBITDA may not be comparable to similarly titled measures of other companies.

Management compensates for the limitations of Adjusted EBITDA as an analytical tool by reviewing the comparable GAAP measures, understanding the differences between the measures and incorporating these insights into management's decision-making processes.

Non-GAAP Reconciliation – 2014 EBITDA and Gross Margin

The following table presents a reconciliation of Adjusted EBITDA and operating margin to net income (loss) for the periods shown for TRP:
